

Launch Set up

- Correct Key
- Get Gas Tank
- Appropriate number of life jackets
- Lights if needed

Basic Operation-

- Make a quick visual inspection of the craft
- Check that the correct fuel and tank is properly connected
- Lower Engine to appropriate level by using switch on throttle or console
- Put throttle in neutral position
- Turn key and check that engine is cooling; adjust as needed
- Gently push throttle forward to accelerate, or back to reverse.
- Adjust engine tilt as needed for water depth and wake

Safety Equipment-

- Life jackets
 - One per athlete
 - One per person on board; children under 13 must wear one at all times.
- Fire extinguisher
- Launch Safety Kit
- Paddle

On Water Safety-

- Limit use of Megaphones in populated hours before 7am
 - (Pete's Harbor, Dock Town, etc)
- Follow Traffic Pattern
- Reduce speed to 5mph in No Wake zones
- Never pass on landside, wake will reverberate
- Be mindful of your own wake and small craft around you

Docking-

- Reduce speed within the Marina
- Put launch in neutral about one boat length from the dock.
- Turn off engine and take hold of the dock
- Secure boat to cleats with tie line
- Engine up
- Remove all equipment
- Return Gas tank to shed and secure lock
